

If you are an electrician or a residential handyman, this Greenlee GT-16 non-contact voltage detector is a must for your tool box. The GT-16 non-contact voltage detector will make all your electrical projects or remodeling safe and easy.

To many electrical workers, this test instrument is a standard part of the tool bag. This voltage detector is adjustable to safely detect power and low voltage without touching the bare conductor. Even more, it's adjustable for use on power wiring plus lighting, thermostats, and other low-voltage circuits. Use the non-contact voltage detector to detect voltage in outlets, lighting fixtures, wires, and cables.

This voltage detector can find breaks in wires, and it makes it easy to identify hot and neutral conductors. The GT-16 features a handy low-battery indicator, and one 1.5 volt AAA battery comes included.

Greenlee warranty covers the non-contact voltage detector with a lifetime limited warranty.
